Used for a short time at Thiemans before being chosen by Mr. Gordon Blackstock to go to Milly Milly Stud in Australia. However, he did sire Coronet Max Leader used by Thiemans very successfully, Coronet Max Leader 3rd, who went to Bapton, again so successfully. The 4th went to Lou Laughland, and again successfully. The 6th, who is still serving at Morrison's in Missouri, a daughter, Augusta Coronita, exported to South Africa at \$7,500.00.

### CORONET MAX LEADER

Priam Royal Leader X	-----	{	Lawton Priam Valley View Rosewood 23rd X
Lavender Coronita 20th X	-----	{	Coronet Max Juggler 18th X Oakwood Lavender 13th X

This 100% dehorning son of Priam Royal Leader was originally chose by Thiemans for herd use because of "his great head, balanced body, and tremendous bone." This choice of Coronet Max Leader has been verified by the impact his offspring has made as improvers of the Shorthorn breed. These cattle are winning in the showing, they are winning at the performance stations, and more important, they are winning the respect of the commercial producer, who is making his living by producing beef. We were very fortunate in securing breeding privileges in this 2450 poud bull.

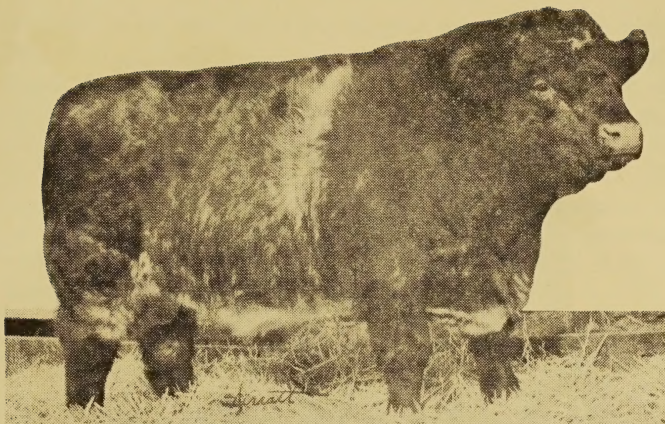

### TPS CORONET LEADER 21st

TPS Coronet Leader 21st, a AAA son of Coronet Max Leader, that has done such a tremendous job for Gordon Bros. of Souris, Man., and Edgar Philpot of Central Butte, Sask. The record of performance of the 21st calves at the Douglas and Saskatoon Performance Test Stations proves that the Leader record of performance is a factor which is being transmitted on through the calves.

We have purchased another son of Coronet Max Leader and out of a half sister to the dam of the 21st, TPS Coronet Leader 49th.

The 49th's dam is also a half sister to TPS Max Coronet 92nd. We have high hopes for how this line of breeding will blend into our herd.

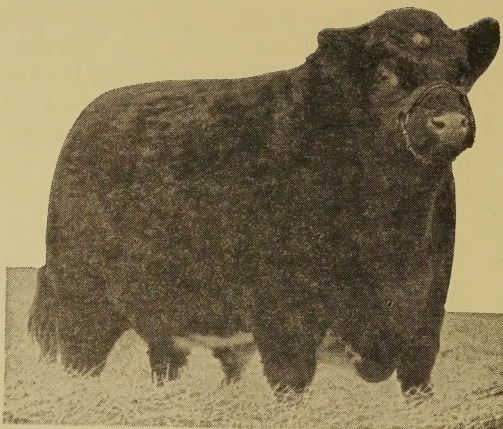

**This is Draper Brothers of Elgin, Man., recently purchased  
son of Coronet Max Leader, TPS Coronet Keystone.**

**A group of daughters of Coronet Max Leader. We know that  
you will like the Leader production.**

TPS Max Coronet 92nd, 1957 International Grand Champion, weighed 2450 pounds in his prime. He, a double grandson of the \$10,000.00 Killearn Max Juggler. We are keeping all his heifers in the herd. The 92nd sired TPS Coronet Galaxy, whose calves make such impressive performance and showing records. Perhaps most noted of these is the AAA TPS Coronet Unlimited presently in service at Thiemans.

REFERENCE SIRE D

THOMAS MAX 31V

To carry on the Max side of our breeding program we have chosen Thomas Max 31V. 31V, a son of TPS Max Coronet 92nd, the 2450 pound International Grand Champion, is out of a daughter of the 2140 pound Carona Perfect, a half brother to Carona Fascination. This large cow, while long on age, has never left a horned calf. She is a heavy milker and has an excellent record of production. We have used this bull heavily and he has an excellent conception record. We know this bull has great growth potential, fleshing ability, and with the breeding that is behind him, he is bound to be an improver.

This is the bull who was the high testing Shorthorn at the Manitoba Performance Test Station at Douglas. He had an average daily gain of 3.34 pounds. This bull is by the 100% dehorning Coronet Max Leader who matured at 2450 pounds. His dam is also a big cow and has never left a horned calf. Without a doubt the most like his half brother, TPS Coronet Leader 21st, of any that we have seen. We have held this bull as a special attraction for our sale.

Eight sons or grandsons of Coronet Max Leader were entered at the Douglas Performance Station. All eight rated in the top half, with an index of 108 average daily gain, or eight percent above the average. They held the top three positions in rate of gain. This consistency accounts for the popularity of the "Leader" progeny.
